

usb GmbH belongs in the Product Lifecycle Management (PLM) environment to the small, but fine service companies with now over 35 years of experience. Our teams develop sophisticated application systems in the aerospace, defence, rail and automotive sectors.

To strengthen our team we are looking for

Configuration Manager (m/f/d)

in the aerospace and automotive industries. The occupational field of configuration manager does not exist as an apprenticed profession. We assume that your technical training means that you have exactly the right qualifications for the tasks.

Your **new area of responsibility**:

- Cooperation in internal and external project teams
- Provision of documents to internal and external stakeholders
- Monitoring/reporting of the respective project status and forwarding to relevant organizational units
- Monitoring/control of development results (documents, software, etc.)
- Planning and implementation of configuration management
- Leading document management
- Gather development results from different departments within a given timeframe and compile these results into a build standard that is made available to customers and archived within the configuration management system

Your **skills/requirements**:

- Technical studies, at least technician (mechanical engineering, electrical engineering, aerospace, information technology)
- Team and communication skills
- organizing ability
- Competent, representative appearance
- Good written and spoken German and English

We offer:

- Interesting cooperation in future-oriented projects
- Diverse development opportunities in our group of companies
- Above-average salary
- Excellent working atmosphere

We would be pleased if we have aroused your interest. Please send your informative application documents by e-mail or post to:
