

usb – expertise in PLM and Configuration Management

For more than 40 years, we have been engaged in the field of product data management for the industries aerospace, defense, automotive, transport and telecommunication. As part of the Bertrandt Group, topics such as digitalization, IoT, Digital Twin and Digital Thread are firmly integrated into our core competencies. Our wide range of services includes engineering and IT services with a focus on consulting, support and process optimization in the product lifecycle. In configuration management (CM), we are recognized as one of the leading companies in Europe.

We are currently seeking the following to strengthen our team:

Change Manager (m/f/d) CM Support

At the Manching (Ingolstadt) location.

Responsibilities of your new position will include:

- Creating and modifying data in the equipment list
- Management of changes and change requests, both internal and from suppliers
- Preparation of submissions for change control committees and boards
- Reviewing the completeness and formality of proposed change requests for committees and boards
- Obtaining input and impact analysis from the various functions/stakeholders as they are affected by a change request
- Arranging for input to be provided on time, cost and quality according to the change planning process
- Updating the change register
- Tracking the KPIs of the change process

Your skills/requirements:

- At least Bachelor's degree in Electrical Engineering, Engineering, Aerospace, Mechanical Engineering or similar
- Experience in CM & PLM, engineering and project management
- Very good MS Office skills
- Ability to work in a team
- Business fluent German and English

Our offer:

usb stands for flat hierarchies, open communication, acting on one's own initiative and an appreciative working atmosphere. We offer a flextime regulation, remote working and 30 vacation days to enhance your work-life balance. In diverse and demanding projects, you can contribute to the development of future-oriented technologies and rise to new challenges. In addition, a comprehensive range of further training courses will be available to you in our Academy.

We look forward to getting to know you and joining forces to implement your career plans!
